

**CS 5110  
Requirements Engineering  
Spring 2018**

**Project Assignment 6  
Due by midnight on, February 22, 2018  
Please submit electronically via Canvas**

**Assignment**

Now that we have a first-cut at identifying the Stakeholders and their Goals for our project, this week we are going to modify that information based on what we heard from the interview and on my feedback from Project Assignment 2.

**Submissions**

- Your modified list from Assignment 2, containing new information. Big note: Clearly identify all of the additions and modifications.
  - The stakeholders
  - The rationale for choosing each stakeholder
  - The goal or goals for each stakeholder
  - The questions that you would like to ask each stakeholder.
- Modify the context diagram
  - Include all the interactions with the external systems.

With this assignment, you should be getting the idea that all of your results are subject to modification as the course progresses. In a few weeks, we will begin assembling your work into a single document.

Don't forget to submit your time logs along with the assignment.
