

SWE 5110
Requirements Engineering
Spring 2018

Project Assignment 2
Due by midnight on Thursday, February 1st, 2018
Please submit electronically via Canvas

Assignment

Now that you have read Chapters 1 through 3 of Discovering Requirements and, in addition, have a description of the term project, it's time to do some brainstorming. Using the lists and recommendations of Chapter 2, identify a preliminary set of project stakeholders. Provide a brief statement of why you believe each is a stakeholder. Then, using the guidelines in Chapter 3, identify the goal or goals for each of the stakeholder that you have identified. Finally, identify 2 or 3 questions that you would like to ask each stakeholder in order to capture their expectations.

Submissions

Submit through Canvas one or more tables identifying:

- The stakeholders
- The rationale for choosing each stakeholder
- The goal or goals for each stakeholder
- The questions that you would like to ask each stakeholder.

Don't forget to submit your time logs along with the assignment.
