CSE 5110
Requirements Engineering
Spring 2018

Project Assignment 3
Please submit electronically via Canvas
Submission Deadline: 01/08/2018

Assignment
Now that we have discussed techniques for eliciting information from Stakeholder interviews, it is time to practice performing a few interviews. Periodically, we will invite Stakeholders to join us as interviewees. Each team will come up with three most important questions to ask the stakeholder. I know there will be some redundancy, which I will help address but we need to make sure that every group participates in a interview.
I will post the schedule of interviews in the Project Module and update it as we identify Stakeholders available for interview.

Additionally for this assignment create a context diagram. Make sure you are trying to address requirements as you identified in assignment 1.

Submissions
- Submit the questions on Canvas by the deadline.
- Submit the context diagram by deadline.
- Within one week after your group's interview, submit through Canvas
  - Your list of prepared questions for the Interviewee
  - The consolidated responses of the Interviewee. (Note: don't just submit your notes – consolidate the responses into a single response for each question.

Don't forget to submit your time logs along with the assignment.
